New packaging units of PTC thermistors on cardboard strips

The packaging of EPCOS PTC thermistors for overcurrent protection on cardboard strips is being optimized. For reasons of environmental protection and sustainability, better use will be made of the space in the carton in future and the packaging units (PU) will be increased. There will be no changes to the affected products in quality and performance.

Product / Process Change Notification

1. ID No. PPD20/T127		2. Date of announcement November 11, 2022	
3. Product / product group PTC thermistors	Old ordering code See UPtoDATE	New ordering code no change	Customer part number
4. Description of change Due to the small quantity of packs in a box for some of strip packing type materials, there is a lot of space left in the box. In light with TDK's global environmental protection efforts, TDK strives to utilize cardboard box primary packing in a most optimal way.			
5. Effect on the product or for the customer (benefit, quality, specification, lead time) Increased number of pieces in packing unit. No change in quality and performance of PTC			
6. Quality assurance measures / risk assessment <ul style="list-style-type: none"> - Release of all affected processes and equipment in Zhuhai according to IATF 16949 - Intensive training program for the production personnel at packing process - Intensified process control and outgoing inspection during the ramp-up phase 			
7. Scheduled date of change February 27, 2023 (or earlier, with written approval by the customer)			
8. Estimated date of first delivery of changed product February 27, 2023 If TDK Electronics AG does not receive notification to the contrary within a period of 10 weeks, TDK Electronics AG assumes that the customer agrees to the change. <input type="checkbox"/> For an interim period we cannot rule out that old as well as new products will be shipped. <input type="checkbox"/> Future shipments can consist of old and new products as the new changed product is used as an alternative to the old product.
