

Block Type EMIFIL BNX003-01
Reference Specification

1. Scope

This reference specification applies to Block Type EMIFIL.

2. Rating

2.1	Customer Part Number	
2.2	Murata Part Number	BNX003-01
2.3	Rated Voltage	150 V(DC)
2.4	Test Voltage	375 V(DC)
2.5	Rated Current	10 A(DC)
2.6	Insulation Resistance	100 MΩ min.
2.7	Voltage Drop	30 mV max.
2.8	Insertion Loss	5 MHz to 1 GHz : 40dB min.
		Line impedance = 50 Ω
2.9	Equivalent Circuits	See the item 4
2.10	Operating Temperature	- 30 °C ~ + 85 °C
2.11	Storage Temperature	- 40 °C ~ + 85 °C

3. Standard Testing Condition

<Unless otherwise specified>

Temperature : Ordinary Temp. 15 °C to 35 °C

Humidity : Ordinary Humidity 25 %(RH) to 85 %(RH)

<In case of doubt>

Temperature : 20 °C ± 2 °C

Humidity : 60 %(RH) to 70 %(RH)

Atmospheric pressure : 86 kPa to 106 kPa

4. Style and Dimensions

Note) Although some part of the product surface seems to be white in some cases, do not care because it is the result of waxing process for humidity resistance improvement. This wax does not make bad affection to mechanical or electrical performance, reliability of the product.

• TERMINAL LAYOUT (BOTTOM FIGURE)

• DIMENSIONS OF INSTALLATION HOLES (front view)

• EQUIVALENT CIRCUIT

• Unit Mass (Typical value)
3.2g

5. Marking

Filter shall be marked as follows.

← Murata mark
← Part Number
← Manufacturing Date
(Ex.) 59
5 ... 1995 (Last digit of the year)
9 ... September
(Jan. to Sept. 1 ~ 9
Oct. : O , Nov. : N , Dec. : D)

6. Electrical Performance

No.	Item	Specification	Test Method
6.1	Insulation Resistance	Meet item 2.6.	Measured at DC rated voltage between terminal (1)(2) and (3)(4). Time : 1 minute Suitable resistor : 1MΩ.
6.2	Dielectric Strength	Filter shall be no failure.	Test voltage shall be applied between terminal (1)(2) and terminal (3)(4). Time : 1 to 5 seconds. Charging current : 50 mA max.
6.3	Voltage Drop	Meet item 2.7.	Rated Current : 10 A
6.4	Insertion Loss	Meet item 2.8.	 *Method of measurement based on MIL-STD-220 Insertion Loss = 20log (E ₀ / E ₁) E ₀ : Level without FILTER (short) E ₁ : Level with FILTER

7. Mechanical Performance

No.	Item	Specification	Test Method
7.1	Appearance and Dimensions	Meet item 4.	Visual Inspection and measured with Slide Calipers.
7.2	Marking	Marking is able to be read easily.	It is inspected Visually.

No.	Item	Specification	Test Method										
7.3	Vibration	Meet Table 1. <table border="1"> <thead> <tr> <th colspan="2">Table 1</th> </tr> </thead> <tbody> <tr> <td>Appearance</td> <td>No damaged</td> </tr> <tr> <td>Insulation Resistance</td> <td>30 MΩ min.</td> </tr> <tr> <td>Dielectric Strength</td> <td>No failure</td> </tr> <tr> <td>Insertion Loss</td> <td>Meet item 2.8</td> </tr> </tbody> </table>	Table 1		Appearance	No damaged	Insulation Resistance	30 MΩ min.	Dielectric Strength	No failure	Insertion Loss	Meet item 2.8	It shall be soldered on the substrate. Range of Vibration Frequency : 10 to 2000 to 10Hz for 20 minutes Testing Time : A period of 2 hours in each of 3 Mutually perpendicular directions (Total 6 hours) Double Amplitude : 1.5mm or acceleration 196m / s ² Then measured after exposure in the room condition for 4 to 24 hours.
Table 1													
Appearance	No damaged												
Insulation Resistance	30 MΩ min.												
Dielectric Strength	No failure												
Insertion Loss	Meet item 2.8												
7.4	Solderability	Then the lead is covered with a continuous new solder coating at least 75% along the circumference of the immersed part.	Flux : Ethanol solution of rosin, 25(wt)% Pre-heat : 150 ± 10 °C, 60 ~ 90 s Solder : Sn-3.0Ag-0.5Cu Solder Temperature 245 ± 5 °C Immersion Time : 2 ± 0.5 seconds 										
7.5	Resistance to soldering heat	Meet Table 1.	Flux : Ethanol solution of rosin, 25(wt)% Pre-heat : 150 ± 10 °C, 60 ~ 90 s Solder : Sn-3.0Ag-0.5Cu Solder Temperature : 270 ± 10 °C Immersion Time : 10s (+ 2s , - 0s) Then measure values after exposure in the room condition for 24 to 48 hours.										
7.6	Resistance to soldering iron		Solder : Sn-3.0Ag-0.5Cu Tip Temperature : 350 ± 10 °C Time : 4 ± 1 s Then measure values after exposure in the room condition for 24 to 48 hours.										

8. Environmental Performance

No.	Item	Specification	Test Method
8.1	Temperature Cycle	Meet Table 1.	1 Cycle 1 step : - 30 °C (+ 0°C , - 3°C) / 30 minutes 2 step : Room Temperature / within 5 minutes. 3 step : + 85 °C (+ 3°C , - 0°C) / 30 minutes 4 step : Room Temperature / within 5 minutes. Total of 10 cycle Then measured after exposure in the room condition for 24 to 48 hours.
8.2	Humidity Life		Temperature : 40 ± 2 °C Humidity : 95 %(RH) Rated Voltage : 150 V(DC) Time : 500 h (+ 24h , - 0h) Then measured after exposure in the room condition for 4 to 24 hours.
8.3	Heat Life		Temperature : 85 ± 2 °C Voltage : Rated Voltage × 2 Time : 1000 h (+ 48h , - 0h) Then measured after exposure in the room condition for 24 to 48 hours.

10. Caution

Limitation of Applications

Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

- (1) Aircraft equipment
- (2) Aerospace equipment
- (3) Undersea equipment
- (4) Power plant control equipment
- (5) Medical equipment
- (6) Transportation equipment (automobiles, trains, ships, etc.)
- (7) Traffic signal equipment
- (8) Disaster prevention / crime prevention equipment
- (9) Data-processing equipment
- (10) Applications of similar complexity or with reliability requirements comparable to the applications listed in the above

11. Notice

11.1. Using the block type EMIFIL® (BNX) effectively

This product effectively prevents undesired radiation and external noise from going out / entering the circuit by grounding the high frequency components which cause noise problem. Therefore, grounding condition may affect on the performance of the filter and following attentions should be paid for effective use.

- (1) Design maximized grounding area in the P.C. board, and grounding pattern for all the grounding terminals of the product to be connected. (Recommended to use our recommendation in this spec.)
- (2) Minimize the distance between ground of the P.C. board and the ground plate of the product. (Recommended to use through-hole connection between grounding area both of component side and bottom side.)
- (3) Insert the terminals into the holes on P.C. board completely.
- (4) Don't connect PSG terminal with CG terminal directly. (See the item 4. TERMINAL LAYOUT)

【 P.C. BOARD PATTERNS 】

Use a bilateral P.C. board. Insert the BNX into the P.C. board until the root of the terminal is secured, then solder.

(1) COMPONENT SIDE VIEW (2) BOTTOM VIEW

11.2. Self-heating

Though this product has a large rated current, the localized self-heating may be caused depending on soldering conditions. To avoid this, following attention should be paid.

- (1) Use P.C. board with our recommendation on hole diameter / land pattern dimensions, mentioned in the right hand drawing, especially for 4 terminals which pass current.
- (2) Solder the terminals to the P.C. board with solder-cover area at least 90%. Otherwise, excess self-heating at connection between terminals and P.C. board may lead to smoke and / or fire of the product even when operating at rated current.
- (3) After installing this product in your product, please make sure of the self-heating with the rated current.

【 Recommendation land pattern 】

11.3. Soldering

(1) Flux, Solder

- Rosin-based flux should be used.
Do not use strong acidic flux with halide content exceeding 0.2(wt)% (chlorine conversion value.)
- Use Sn-3.0Ag-0.5Cu solder.

(2) Standard flow soldering profile.

- (3) Resistance to soldering iron goes in the following condition that tip temperature is 350 °C max. and soldering time is 5s max.
- (4) Products and the leads should not be subjected to any mechanical stress during soldering process. (and also while subjected to the equivalent high temperature.)

11.4. Cleaning Conditions

Products shall be cleaned on the following conditions.

- (1) Cleaning temperature shall be limited to 60 °C max. (40 °C max. for IPA.)
- (2) Ultrasonic cleaning shall comply with the following conditions, with avoiding the resonance phenomenon at the mounted products and P.C.B.
- Power : 20W / l max. Frequency : 28kHz to 40kHz Time : 5 minutes max.
- (3) Cleaner
1. Cleaner
 - Isopropyl alcohol (IPA)
 2. Aqueous agent
 - PINE ALPHA ST-100S
- (4) There shall be no residual flux and residual cleaner after cleaning.
In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.
- (5) The surface of products may become dirty whitely after cleaning.
But there is no deterioration on mechanical, electrical characteristics and reliability.
- (6) Other cleaning
Please contact us.

11.5. Operating Environment

- (1) Do not use products in corrosive gases such as chlorine gas, acid or sulfide gas.
- (2) Do not use products in the environment where water, oil or organic solvents may adhere to product.

11.6. Storage condition

(1) Storage period

Use the products within 12 months after delivered.
Solderability should be checked if this period is exceeded.

(2) Storage environment condition

- Products should be stored in the warehouse on the following conditions.
 - Temperature : - 10 °C to + 40 °C
 - Humidity : 15 % to 85% relative humidity No rapid change on temperature and humidity
- Don't keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
- Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
- Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.

(3) Delivery

Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

12.  Notes

- (1) Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.
- (2) You are requested not to use our product deviating from the reference specifications.
- (3) The contents of this reference specification are subject to change without advance notice. Please approve our product specifications or transact the approval sheet for product specifications before ordering.
